EXCLUSIVE

Massive deck

EXCLUSIVE, Dolomite grey

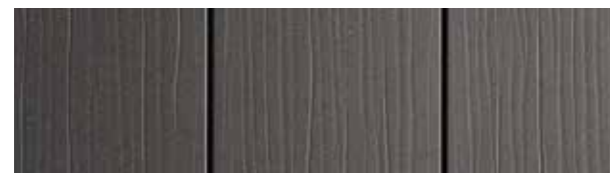

Right on time for the opening of the garden season, NATURinform is launching its EXCLUSIVE deck in three new shades of grey, basalt, lava and dolomite. Puristic and clean in both looks and surface structure, this deck of weatherproof, sturdy wood composite material is very similar to natural stone, and will delight building owners and architects alike. An innovative deck profile and an innovative laying aid enable a gap of 5 millimetres. The narrow gap enhances the deck's surface with its lively colouring, giving it an elegant look.

PATIO DECKS AND ACCESSORIES

Patio decks
in Dolomite, Basalt and Lava grey
ca. 21 mm high and ca. 162 mm wide.
Weight: 3.8 kg/m

Surface stamped on one sight, matte

Standard lengths from 3 m / 4 m / 5 m / 6 m
Special lengths from ca. 2 m to 13 m are available
at extra cost. Requirements for 1 square metre
are ca. 6 m patio decks.

Laying aid
for rational and even laying of the decks, is delivered
with the decks purchase

Pris Pr meter Kr 165,- inkl mva
Pris Pr m2 Kr 990,- inkl mva
Evt Klipps Kr 585,- pr pose/Kr 80,- pr m2

LAYING

New: with narrower gap

When laying, you must take care that the laying aid provided in the parcel is used in any case. This way you can achieve a gap of only 5 and not – as otherwise standard – 7,5 millimetres.

The deck, which can be laid on one side, is 162 millimetres wide. Therefore you only need 6 running metres of material for one square metre, resulting in a weight of around 22.8 kilogrammes per square metre. The deck with its new, sophisticated shades of grey and with a stamped, matte surface is available in the standard lengths of 3, 4, 5 and 6 metres. NATURinform can provide special lengths ranging from 2 to 13 metres for special projects if requested.

When constructing a patio or balcony surface structure, standard stainless steel brackets are to be used. The producer provides **gap holders** with each order and brackets for optimum laying results for a 5 millimetre gap. NATURinform points out in this context that the system profile mounting clip can not be used here, but all underlying constructions in the producer's range can.

IMPORTANT NOTE

It is not possible to use a joint profile tube and mounting clip with the EXCLUSIVE deck. The deck can only be used on one side: Please note the laying side! You can find laying films on patio construction online at: www.naturinform.de
